National Fire Protection Diamond advisory for AmpCool AC-122 is:

BLUE IS HEALTH HAZARD
"0" is the lowest hazard class

RED IS FIRE HAZARD
"1" means that this material will ignite, but with difficulty.

YELLOW IS REACTIVITY WITH OTHER CHEMICALS
"0" indicates that this material is stable

The GHS Communication Standard requires that all hydrocarbon based chemicals be designated a Category 1 Aspiration Hazard if they have a kinematic viscosity ≤ 20.5 cSt. @ 40C. This includes some of our Dielectric Coolants, regardless of all other characteristics (including their biodegradation, non-toxicity, and food grade certification)

These products do not pose a toxicity risk if small amounts are ingested by mouth. However, the standardized wording does not make this differentiation clear and requires the statement even though there is little health risk posed by swallowing. The most probable hazard related to aspiration posed by AC-122 is the inhalation of a "mist" of the product.
